

CatsNAP Anesthesia and Surgical Release Form

Feline Neuter (orchietomy) is the **surgical removal of the testicles** – the scrotum will remain. Neutering makes cats sterile so they are unable to reproduce—they can still get female cats pregnant for up to 4 weeks after surgery. The typical male urine odor will also be reduced that can take several weeks. Some male cats will still spray urine after being neutered and may still want to go outside to hunt.

General anesthesia is required to perform the surgery. We will take many precautions before, during and after the surgery to avoid complications. However, **complications as a direct result of anesthetic drugs and/or surgery, up to and including death, are possible** – these complications are very rare.

CatsNAP (Cats Neutered at Parkdale) is a reduced fee cat neuter service offered by and at Parkdale Veterinary Wellness Center only. Intact male cats that are in **good physical condition, have two descended testicles and are at least 4 months of age** will be neutered. **Cost of an exam, the neuter and a rabies vaccine is \$30.** Recommended lab tests, medication, vaccines and other preventive/surgical care are not included in this price.

Additional services are available for an additional fee:

FeLV/FIV & HWD Test	FVRCP Vaccine	FeLV Vaccine	Microchip
			
Ear Tip Removal (for strays, left ear flap tip removed) FREE	Onsior Pain Control (1 dose)	Intestinal Dewormer	Flea Treatment: Revolution Plus (fleas, ticks, ear mites, worms (round/hook/heart) lasts 1 month), Catego (fleas & ticks lasts 1 month), Capstar (fleas lasts one day)

Total due today is \$30.00 plus any of the other services I chose as listed above.

**** If I am paying with a coupon I understand I am responsible for 100% of the cost not covered by the coupon and if the coupon issuing organization fails to pay Parkdale Veterinary Wellness Center I will be held responsible for 100% of the remaining cost.**

I understand that if upon examination my cat is female, deemed unhealthy or has abnormal reproductive organs he/she will not be neutered and a refund of \$15.00 will be made at the time of discharge (\$15.00 for exam and rabies vaccine will be retained). **If my cat has fleas he will be treated at an additional cost which will be paid before discharge from the hospital.**

CatsNAP does not encourage you to approach stray or wild cats. They can be dangerous and transmit serious diseases, including deadly rabies. Their bites and scratches can lead to severe infection sometimes requiring surgery.

I certify I have the authority over the above-named Cat and authorized the doctors and staff of Parkdale Veterinary Wellness Center to perform the procedures indicated above. I understand there is a risk of complications up to and including death. I agree to hold Parkdale Veterinary Wellness Center and the doctors and staff free from any responsibility and/or liability in the absence of gross negligence. I understand I am responsible for payment in full at the time of this registration.
